no. 20

This paper is one of a series issued by The Geographer, Bureau of Intelligence and Research of the Department of State. The aim is to set forth the basis for national arrangements for the measurement of the territorial sea or the division of the continental shelf of maritime nations.

This research document is intended for background use only. This document does not represent an official acceptance of the United States Government of the line or lines represented on the charts or, necessarily, of the specific principles involved, if any, in the original drafting of the lines. Additional copies of the studies may be requested by mail from The Geographer, Department of State, Washington, D. C. 20520 or by phone (Telephone: 63-22021 or 63-22022).

INTERNATIONAL BOUNDARY STUDY

## STRAIGHT BASELINES: SAUDI ARABIA

The Government of Saudi Arabia published in the Official Gazette (umm al-Qura), No. 1706 of February 21, 1958 a royal decree creating straight baselines for the coasts of the Kingdom. No official charts, however, have been published detailing the positions of the straight baselines. Due to the particular language of the decree, it is impossible to plot the decree lines with any degree of accuracy on a chart. As a result, no map accompanies this study although a brief discussion of possible limits has been added.

Royal Decree No. 33 of February 16, 1958 states:

With the help of God Almighty;

We, Sa'ud ibn 'Abd al-'Aziz Al Sa'ud, King of Saudi Arabia;

In accordance with the dictates of the public interest;

Have decreed as follows:

Article 1. For the purposes of this decree,

- a. The term "nautical mile" is the equivalent of 1,852 meters;
- b. The term "bay" includes any inlet, lagoon or other arm of the sea;\*
- c. The term "island" includes any islet, reef, rock, or permanent artificial structure not submerged at lowest low tide; \*\*
- d. The term "shoal" denotes an area covered by shallow water, a part of which is not submerged at lowest low tide;
- e. The term "coast" refers to the coasts of the Red Sea, the Gulf of 'Aqabah, and the Persian Gulf.

Article 2. The territorial sea of the Kingdom of Saudi Arabia, as well as the air space above and the territorial sea bed and the subsoil beneath are under the sovereignty of the Kingdom, subject to the established rules of international law.

\*The term "inlet" renders two Arabic words used in the original text: (Sharm), which is used in the Red Sea, and (Khaur), which is used in the Persian Gulf.

\*\*The term "reef" renders two Arabic words used in the original text: (Fasht), which is used in the Persian Gulf, and (Shi'b), which is used in the Red Sea. The terms (Qut'ah) and (Qassar) denote two different types of intermittently submerged obstacles, not properly to be rendered as "bar", the common term for which in the Persian Gulf is (Hidd).

Article 3. The inland waters of the Kingdom include:

- a. The waters of the bays along the coasts of the Kingdom of Saudi Arabia;
- b. The waters above and landward from any shoal not more than twelve nautical miles from the mainland or from a Saudi Arabian island
- c. The waters between the mainland and a Saudi Arabian island not more than twelve nautical miles from the mainland;
- d. The waters between Saudi Arabian islands not farther apart than twelve nautical miles.

Article 4. The territorial sea of the Kingdom of Saudi Arabia lies outside the inland waters of the Kingdom and extends seaward for a distance of twelve nautical miles.

Article 5. The following are the base-lines from which the territorial sea of the Kingdom of Saudi Arabia is measured:

- a. Where the mainland or the shore of an island is fully exposed to the open sea, the lowest low-water mark on the shore;
- b. Where a bay confronts the open sea, lines drawn from headland to headland across the mouth of the bay;
- c. Where a shoal is situated not more than twelve nautical miles from the mainland or from a Saudi Arabian island, lines drawn from the mainland or the island and along the outer edge of the shoal;
- d. Where a port or harbor confronts the open sea, lines drawn along the seaward side of the outermost works of the port or harbor and between such works;
- e. Where an island is not more than twelve nautical miles from the mainland, lines drawn from the mainland and along the outer shores of the island;
- f. Where there is an island group which may be connected by lines not more than twelve nautical miles long, of which the island nearest to the mainland is not more than twelve nautical miles from the mainland, lines drawn from the mainland and along the outer shores of all the islands of the group if the islands form a chain, or along the outer shores of the outermost islands of the group if the islands do not form a chain;
- g. Where there is an island group which may be connected by lines not more than twelve nautical miles long, lines drawn along the shore of all the islands of the group if the islands form a chain, or along the outer shores of the outermost islands of the group if the islands do not form a chain.

Article 6. If the measurement of the territorial sea in accordance with the provisions of this decree leaves an area of high sea wholly surrounded by the territorial sea and extending not more than twelve nautical miles in any direction, such area shall form part of the territorial sea. The same rule shall apply to a pronounced pocket of high sea which may be wholly enclosed by drawing a single straight line not more than twelve nautical miles long.

Article 7. If the territorial sea measured from the base-lines fixed by Article 5 of the decree be overlapped by the waters of another state, boundaries will be determined by our Government in agreement with that state in accordance with equitable principle.

Article 8. To assure compliance with the laws of the Kingdom relating to security, navigation, fiscal and sanitary matters, maritime surveillance covers a contiguous zone outside the territorial sea, extending for a distance of six nautical miles in addition to the twelve nautical miles measured from the base-lines of the territorial sea, in accordance with Article 5 of this decree.

Article 9. The provisions of this decree shall not affect the rights of the Kingdom with respect to fishing.

Article 10. Decree No. 6/4/5/3711\* promulgated on 1 Sha'ban 1368 corresponding to 28 May 1949 is revoked.

Article 11. Our Ministers of Foreign Affairs, Interior, Finance, and Health are charged with the execution of this decree, each with regard to the provisions concerning him.

Article 12. This decree shall come into effect as of the date of its publication in the Official Gazette.

\* The original Arabic shows "Decree No. 6/5/4/3711," which is in error.

#### ANALYSIS

Several unusual features occur in the Saudi decree. A "bay", for example, does not have to meet the semi-circularity requirement or the 24-nautical miles closing limit of the Geneva Convention. According to the decree a "bay" includes any inlet, lagoon or arm of the sea.<sup>1</sup> It should be noted that Saudi Arabia is not a party to the Geneva Convention on the Territorial Sea and the Contiguous Zone.

Secondly, the term "island", as used in the decree, refers to any elevation not below lowest low water. By this definition "drying rocks" or even "rocks awash" qualify as islands which may be utilized for the measurement of the territorial sea or

---

1. The language of the Decree is nearly identical with that of the Egyptian Decree of 1951. See IBS - Series A, No. 22 -- Straight Baselines: United Arab Republic.
