

FSU College of Law Library

Basic Legal Research Series

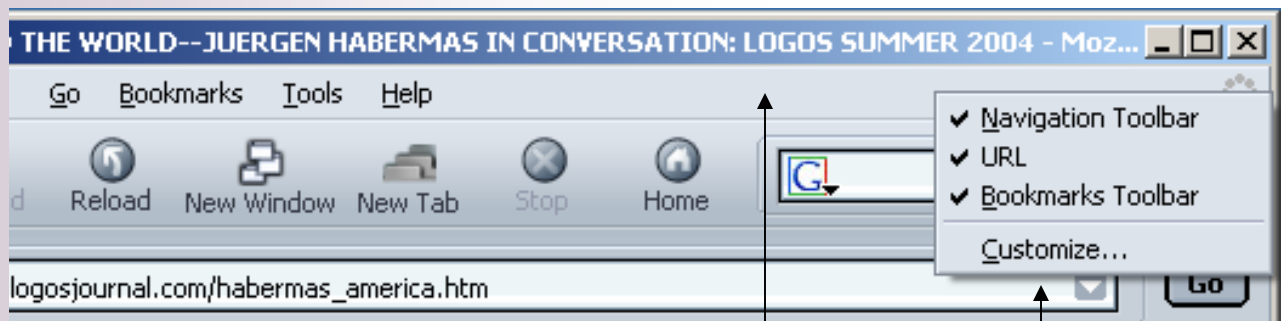

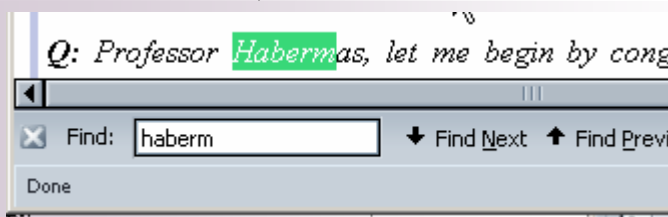

Firefox

Basic Features

To search within a page, click on Edit and then Find in This Page.

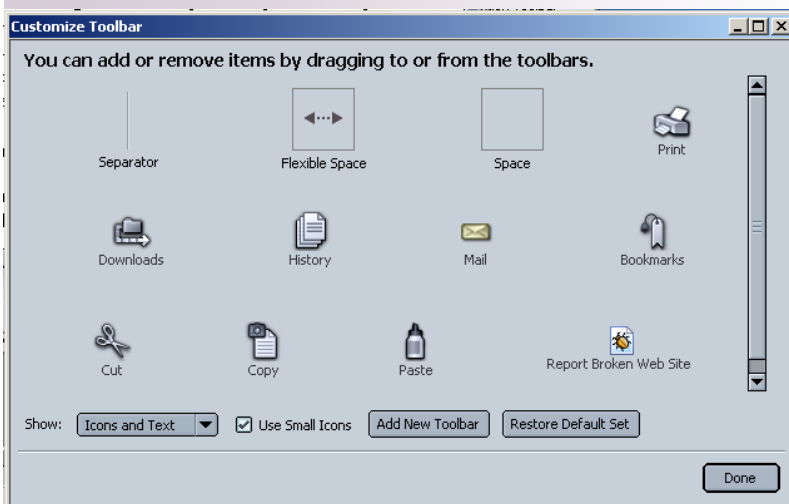

Firefox will open a search box on the bottom left hand side of the browser window. It will find words as you type. Also when you type a word that is not found the color and sounds change so that you know immediately that that spelling is not in the document.

To customize the toolbar, right click on the upper toolbar and then click Customize.

From here you can add buttons for a new tab, new window, print and more. You can also add additional Toolbars or change the appearance of the icons.

To add Extensions click on Tools and then click on Extensions

Then click on Get More Extensions.

You can then browse from a list of available extensions.

You can also search for extensions.

A few of the better extensions are:

- Resize Search Box
- Tab Preview
- ConQuery
- Advanced Dork
- Forecastfox
